Mother Osprey
Nursery Rhymes for Buoys & Gulls

By Lucy Nolan
Illustrated by Connie McLennan
What if Jack and Jill had been playing on a nice soft sand dune instead of that treacherous hill? And suppose Mary’s pet wasn’t really a lamb. What if Mary had a little . . . clam? With clever twists on old standards, Mother Osprey is a salute to sea breezes, sand, and just plain silliness.

It’s so much more than a picture book . . . this book is specifically designed to be both a fun-to-read story and a launch pad for discussions and learning. Whether read at home or in a classroom, we encourage adults to do the activities with the young children in their lives. Free online resources and support at www.ArbordalePublishing.com include:

- For Creative Minds as seen in the book (in English & Spanish):
  - Poem-related fun facts
  - Map activity
  - Poem-related questions
  - Food for thought
- Teaching Activities:
  - Reading Questions

Award-winning author Lucy Nolan spent many childhood days roaming two very special islands: Pawleys Island, SC, and Amelia Island, FL, where she collected the family stories that were shared around the dinner tables of hundred-year-old homes. It was only natural that she would eventually combine her love of the sea and storytelling into Mother Osprey: Nursery Rhymes for Buoys & Gulls. This playful book retells Mother Goose rhymes and embodies everything Lucy loves about America’s coastlines! Lucy has been writing since she was 4 years old and is the author of the Down Girl and Sit chapter books. Lucy lives in Columbia, SC with her daughter and two rambunctious dogs.

Award-winning illustrator Connie McLennan has been a freelance artist for over 25 years, since attending Academy of Art College in San Francisco. In addition to illustrating Mother Osprey: Nursery Rhymes for Buoys & Gulls, she has also illustrated The Rainforest Grew All Around, River Beds: Sleeping in the World’s Rivers, Water Beds: Sleeping in the Ocean, and Octavia and Her Purple Ink Cloud for Arbordale Publishing. Her studio is at her home in northern California, where she lives with her husband, teenage son, and a playful kitten.
Mary Had a Little Clam

Mary had a little clam—its shell was white as snow.
And everywhere that Mary went, the clam was sure to go.

He followed her to school one day.
He set out in September
but reached the school in mid July—clams cannot rush, remember?

Where were all the boys and girls to play with as he’d dreamed?
School was out for summer break—boy, was that clam steamed!
Jack & June
Jack and June went up a dune to see the big wide water; Jack fell down and rolled around, and June came tumbling after. Jack and June all afternoon did stay in constant motion; used their pail to bail and bail, but couldn't drain the ocean.

Buoys & Gulls
What are little buoys made of, made of? What are little buoys made of? "A bell and a light that flashes at night, that's what little buoys are made of."
What are little gulls made of, made of? What are little gulls made of? "Mischief and daring and one pickled herring, that's what little gulls are made of."
Sing a Song of Sixpence

Sing a song of sixpence,  
a pocket full of hay;  
four and twenty pelicans  
fixed a luncheon tray.

When the tray was finished,  
the birds knew what to do;  
they set this very dainty dish  
before the trawler crew.

The first mate ate his sandwich  
while hauling in the catch;  
the captain ate more slowly  
while sitting on the hatch.

The deckhand asked for seconds;  
it was his favorite dish:  
a little peanut butter—  
and lots of jellyfish!
Row, Row, Row Your Boat
Row, row, row your boat. Start in Biscayne Bay.
If you come upon a shark, row the other way!
Row, row, row your boat. Now the 'Glades begin.
Never touch a floating log with a toothy grin!
Row, row, row your boat, through the Florida Keys.
If a pirate asks to ride, make sure that he says, “Please!”
Row, row, row your boat, ’round and ’round Key West.
Now your arms are surely tired; stop and take a rest!
Mary Had a Little Clam

The muscular “foot” of a clam is used mainly for digging, but can sometimes be used for “creeping” or even “leaping” away from predators. Clams are bivalves; they have two shells attached by a hinge. Their shells grow with them as they grow—just as our bones grow as we do! Many people enjoy eating steamed clams—do you?

Buoys & Gulls

Buoys mark deep water channels for boaters or mark fishing or lobster traps. Buoys can also be used to measure weather information.

As a black-headed laughing gull wheels through the air with a loud “ha-ha-ha,” it sounds as if he’s mischievous. Perhaps he’s delighted by his tasty diet of fish, garbage, sewage, and scraps from fishing boats!

Sing a Song of Sixpence

Don’t ever let a brown pelican ask you to dinner. He might expect you to dive headfirst into the ocean, scoop up fish with your mouth, and then swallow them whole! Peanut butter is made from peanuts but jelly isn’t made from jellyfish—it’s made from fruit like grapes or strawberries.

Row, Row, Row Your Boat

While boating in the Everglades, you might bump into an alligator—or even an American crocodile! Alligators live in fresh water and have wide, U-shaped, rounded snouts. Crocodiles live in salt or brackish water and have longer, more pointed, V-shaped snouts.

Hatteras Light Is Falling Down

In 1999, the Cape Hatteras Lighthouse, the tallest lighthouse in the United States, was moved over half a mile inland to keep it from falling into the sea due to beach erosion. The move took 23 days.

An Old Woman who Lived in a Shell

Would you believe that oysters start off their lives footloose and fancy-free? Young oysters float around until they begin to grow a shell, then they drop to the bottom and form a reef with other oysters. It seems that when oysters meet, they grow quite attached to each other! An oyster “group” is called a “bed.”

Lydia Gail

Legend says the Indian giant Maushop dumped the sand out of his moccasin to form Nantucket Island. What happened to the sand from his other moccasin? That became Martha’s Vineyard. Both islands are part of Cape Cod.

I Saw A Ship A-Sailing

Did you know Texas once had its own Navy? Of the four original ships, one was wrecked in a storm, one was wrecked in battle, one was captured by Mexico, and one was sold because the Republic of Texas couldn’t pay for repairs!

Lobster Pies

To avoid being eaten, a lobster should stay out of the kitchen—and the parlor. Lobstermen call the front of the lobster trap the kitchen, and the back is called the parlor! Lobsters found in New England have front claws with pinchers, unlike the Spanish lobsters found in southern waters.

Two Skippers from Texas

Despite its massive size, an orca killer whale is quite agile and can reach speeds of 30 miles per hour. The vegetable, okra, on the other hand, grows in gardens!

Twinkle, Twinkle

Most people think of asteroids circling the sun. But did you know that “asteroid” is also the scientific name for most common sea stars?
Map Activity Questions

Use the map and compass rose to answer the following questions. Answers are upside down on the bottom of the page.

1. What is the name of the country north of the United States?
2. What is the name of the country south of the United States?
3. Are the Great Lakes north or south of the Gulf of Mexico?
4. Is Nantucket (represented by Lydia Gail’s bucket) on the East or West Coast of the United States?
5. Find the covered wagon on the map. What are the grid coordinates?
6. Find the Everglades (represented by the crocodile) on the map. What are the grid coordinates?
7. Find the Cape Hatteras Lighthouse on the map. What are the grid coordinates?
8. In which direction would you have to go to travel from the Florida Everglades to see the Cape Hatteras lighthouse?
9. Is the sea otter in the Atlantic or Pacific Ocean?
10. Into what body of water does the Mississippi River flow?
11. How many sand dunes are marked on the map? Are they all by the ocean?
12. How many Great Lakes are there, and what are their names?

Food for Thought

The poems relate in some way to water: oceans, bays, lakes, or rivers. Why do you think water is so important to us?

Poem-Related Questions

1. How long did it take Mary’s clam to get to school (September to July)? Why do you think it took so long?
2. Why do you think the Hatteras Lighthouse started falling down? Do you think it was easy to move it? Why or why not?
3. Would an old lady living in a shell use oyster beds? What are oyster beds? Would you like to sleep on one?
4. What do you think the “Witch of November, 1913” was?
5. What type of “ship” sailed across the prairies?

Twinkle, Twinkle

Twinkle, twinkle, starfish dear,
Hiding in the shallows here.
Just beneath the waves you lie
Like a star tossed from the sky.
Twinkle, twinkle, starfish dear,
Hiding in the shallows here.
