Felina's forest is shrinking...

Felina the Florida panther loves growing up in her forest home, until the forest starts to shrink! Trees begin to disappear, and Felina doesn't understand the new busy highway in the neighborhood. Other animals are in danger, too. Will Felina find a way to survive as humans threaten to ruin her home? Environmental science writer Loran Wlodarski gives children a look into deforestation and endangered animals in ***Felina's New Home: A Florida Panther Story***, complemented by the detailed, emotive illustrations of Lew Clayton. Learn whether the animals in Felina's forest adapt to the new human presence and what children can do to keep wild animals safe, happy and healthy.

"You'll find a lot of food for thought here, and you and your child will be encouraged to think about how our choices affect our environment and our animal neighbors." - **Eclectic Homeschool Online**

"From Felina's story, children will learn of wildlife in many areas of the world, and how human changes affect their habitats. Children will also gain knowledge of ways they can help." - **BookLoons**
